

Challenge Based Learning for Social Innovation

Dr. Roisin Lyons
University of Limerick

The poster for the Digital Inclusivity Symposium features a central graphic of a tree where the branches are circuit traces and the leaves are small circles. The text 'Digital Inclusivity Symposium' is prominently displayed at the top. Logos for SETU (South East Technological University) and IGNITION (European Digital Literacy Coalition) are present. A 'Limited Places' badge is on the left, and the location 'SETU Arena' and dates 'March 14 - 16' are at the bottom. The Erasmus+ logo is in the bottom left corner.

Previous CBL/Hackathon Experience

- Have participated as mentor or judge at 50+ online/offline Hackathons (Techstars, corporate, SW Dub Women).
- Created Irelands largest annual University hackathon series (DCU Hack4Change)
- Published works on the efficacy of hackathons and their pedagogical importance
- Large international research project underway (Expected 2000 respondents)

November 18, 2020

DCU'S LIFE PROGRAMME: INSIGHT INTO AN AWARD WINNING BUSINESS AND ENTREPRENEURSHIP MODULE

What is Social Innovation?

- The creation of new ideas displaying a positive impact on the quality and/or quantity of life (Pol and Ville, 2009, p. 884).
- Innovation that is driven by the social needs of its intended rather than profit-seeking.
- A fitting pedagogy should foster socially aware students; who have both critical and systems thinking skills, **empathy** and an appreciation for human behaviour, and who can leverage innovative competencies to develop **solutions** for positive social impact (Lyons and Bender, 2023).
 - Orientations of system thinking, co-creation, and sustainability (Wang et al., 2022).
 - “transformative ambition” (Unger, 2015, p. 233-34)

What is Social Innovation Education?

...a collaborative and collective learning process for the empowerment and socio/political activation of students to drive positive change no matter their professional pathways. SIE builds students' competences to identify opportunities for social value creation, to form collaborations and build relationships and take innovative action for a more democratic and sustainable society.

(Kalemaki et al. 2021, p.390)

What is Challenge Based Learning?

An experience where the learning takes place through the identification, analysis and design of a solution to a sociotechnical problem.

The learning experience is typically multidisciplinary, takes place in an international context and aims to find a collaboratively developed solution, which is environmentally, socially and economically sustainable.

(Malmqvist, Rådberg, and Lundqvist 2015, 87)

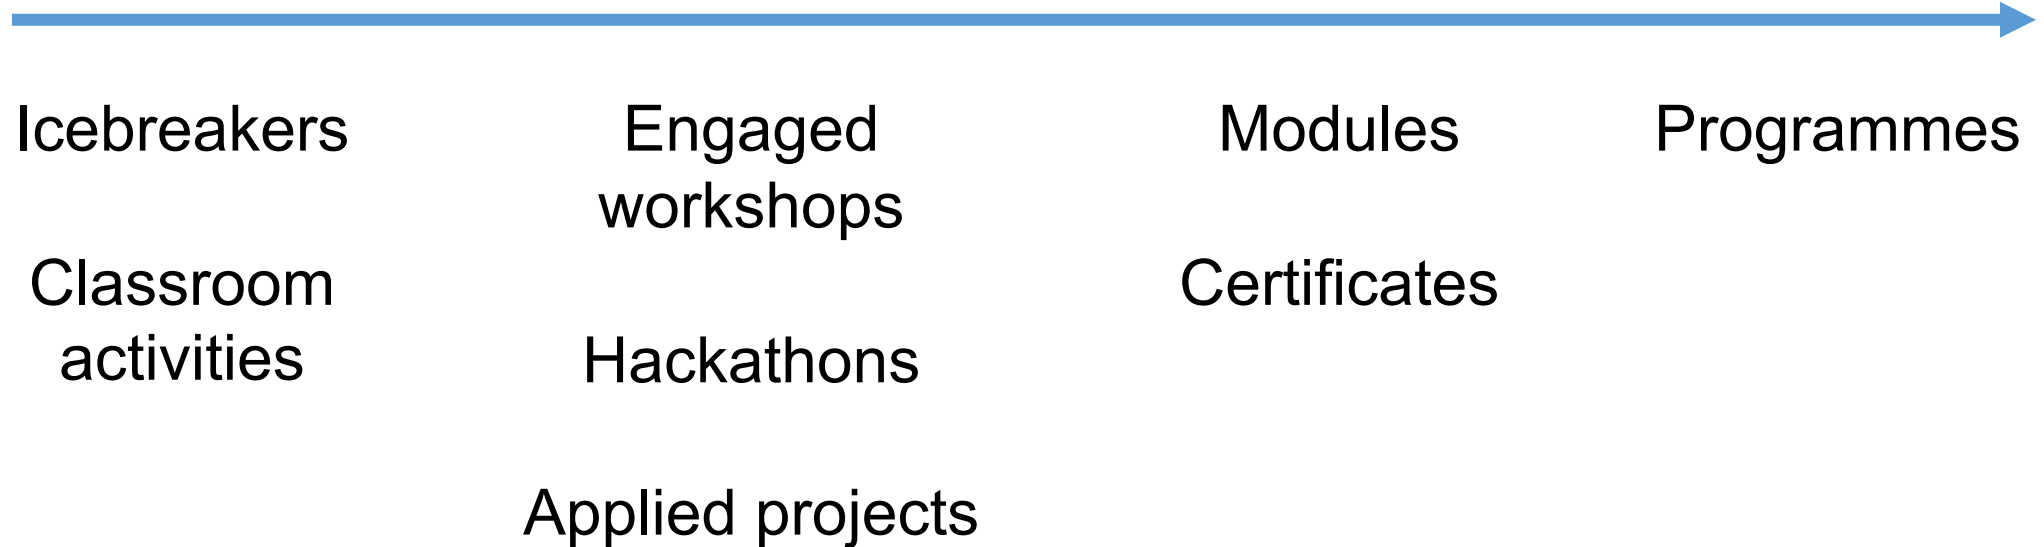

Elements of CBL

- Stakeholders from discrete domains, acting in a collaborative capacity (co-creation) (Garay-Rondero et al. 2019; Membrillo-Hernández et al. 2018)
- A focus on urgent sustainability and social issues (Garay-Rondero et al. 2019).
- Process focus more than output focus (Gallagher & Savage, 2020).
- Authenticity: engagement in real-world challenges (Conde et al. 2017, 252)
- Technology supported and enabled experiences (Gallagher and Savage, 2020)

**They need to
feel they can
contribute to
something
larger than
themselves**

What is a hackathon?

A hackathon is a live event where participants commit to a problem or project in a short-form intensive working group (Čović & Manojlović, 2019).

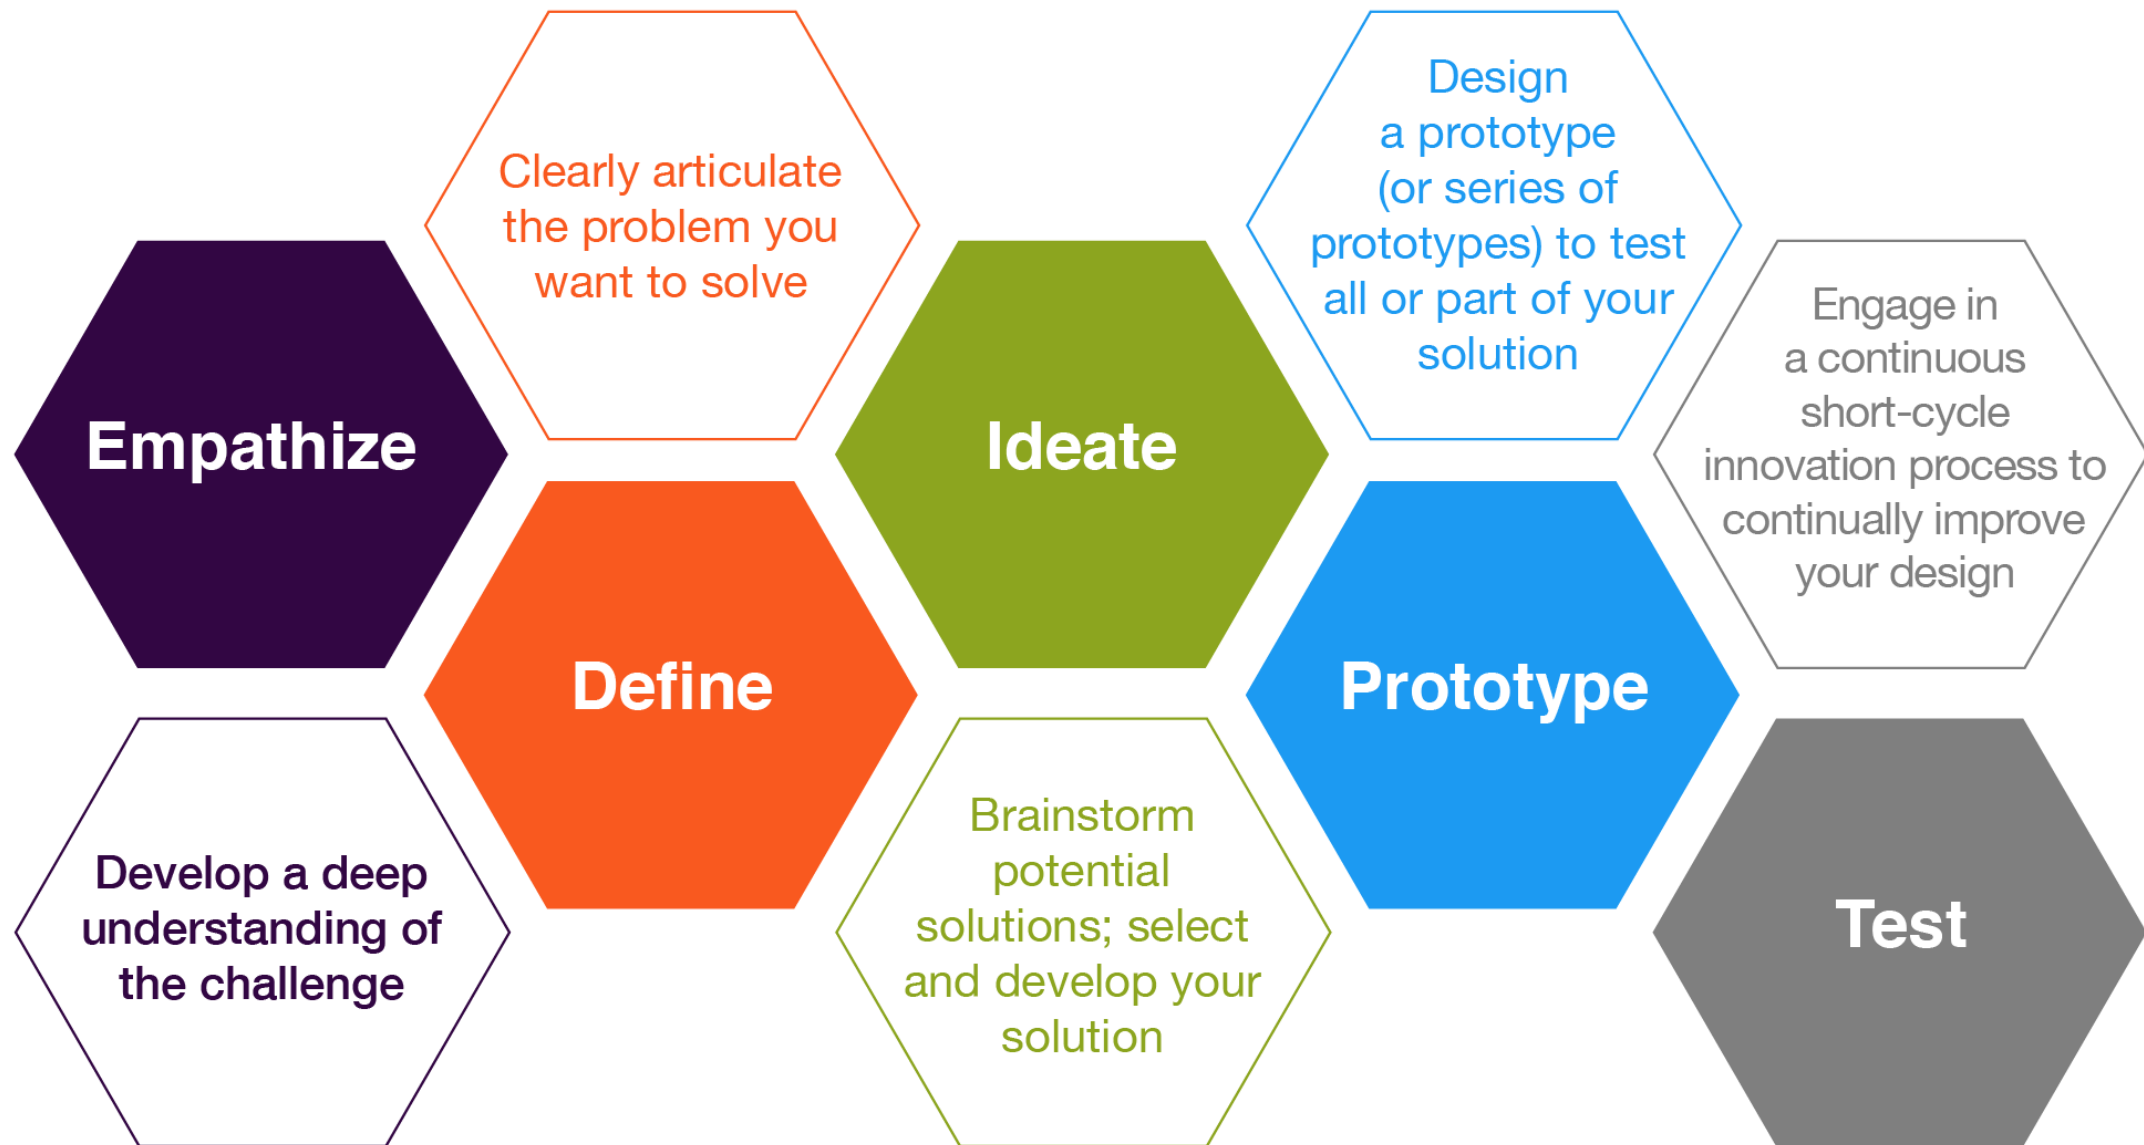

They engage students, employees, or citizens in collaborative challenges, devising innovative solutions which may lead to the creation of new start-up ventures.

Hackathons are intended to be experiential, active, and filled with expert and peer interaction.

What is a Hackathon?

- Derived from the words '**hack**' and '**marathon**'
- Initially hackathons were used in the IT community where programmers, project managers, and designers collaborated intensively on software projects to co-create novel solutions (Kienzler & Fontanesi, 2016).
- Increasingly, they are being used as a method of engaging students, employees and citizens in collaborative project events – many to create start-ups or innovative corporate ideas, or to consider wicked/complex problems.

International Examples of Note

Famous student innovation hackathon based in MIT. Admissions puzzle to enter. Check out their resource list.

- [Amazon Sustainability](#): Publicly available datasets on sustainability
- [City Bike API](#): Bike sharing data
- [Data.gov](#): Hundreds of datasets related to sustainability and its benefits
- [Envirofacts](#): API to access EPA environmental data in U.S. EPA databases
- [EPA](#): Data repositories from the United States Environmental Protection Agency (EPA)
- [Google Sustainability](#): Data sources and modeling capabilities
- [Microsoft](#): Open source tools and API to support sustainability and environmental science
- [OECD](#): Datasets on environmental data and sustainability
- [Planet OS](#): Data catalog of weather, climate, and environmental data

The event is held annually at the beginning of October in over 320 various locations for 48 hours. The goal is to address real-world problems about space and earth using NASA's free and open data. In 2021, NASA had 28,000 participants from 162 countries, with over 2,500 projects from 28 challenges.

Founded in 2014, HackZurich rapidly became Europe's largest and most prestigious Hackathon. Every year, 600 international participants, selected from a global pool of 5500 applications, representing several elite universities from more than 85 countries, are invited to Zurich. Here these tech talents develop highly innovative web-, mobile- and hardware applications during a 40-hours hackathon in teams of 2 to 4 people.

Citywide or community based hackathons engaging citizen innovation are growing. E.g. In Vienna Wiener Linien – the public transport operator leveraged a hackathon to get a digital ticketing prototype, and in doing so – buy-in/engagement from the public and media.

#EUvsVirus
challenge

MATCHATHON

WORLD RECORDS!

2235 New Partnerships

1500 Curated Meetings

200 Speed Datings

500+ Partners

120 Projects

40 Countries

www.euvsvirus.org

The event drew over 30,000 people from across the EU and saw 2,164 project submissions related to various areas of the pandemic. Here's a breakdown of how the projects were spread:

Health and life - 899 projects

Business continuity - 381 projects

Remote working and education - 272 projects

Social and political cohesion - 453 projects

Digital finance -- 76 projects

Other challenges - 83 projects

117 finalists and winners were selected and attended the later EUvsVirus Matchathon (22-25 May) and Demo Day (21 May), where they were matched with investors, accelerators and venture capitalists.

Example: Embedded Hackathon in Module

- 1st year enterprise education module for business students.
- 7.5 ECTS, yearlong.
- 650+ students annually.
- Team taught. Experiential & blended – created to be hybrid
- Developed using best practices from entrepreneurship education research
- Created using the Entrecomp framework
- Peer-reviewed by leading experts incl. Prof. Candida Brush (Babson)
- Co-created with an industry advisory board

Aiming to build entrepreneurial and innovative **self-efficacy** and competencies in a broad student base.

Lets see one in action:

Hackathon Format

- Form Teams
- Analyse Theme, Topic or **Problem**
- Brainstorm/Ideate
- Devise a **Solution**
- Receive feedback and mentorship
- Develop concept and try to **Validate** it
- Develop presentation
- Pitch to judges!

Company Name: _____
 Team No: _____

Impact Canvas

Our company aims to help _____ to _____ by _____.

 Problem	 Solution	 Validation
<p>What is the problem? Describe this in detail Who has this problem? Target a single group? How many people have this problem? Where/when/how does this problem occur? Why does this problem occur? Is it a local or global problem that must be solved?</p>	<p>Think of some new ways to solve your problem:</p> <ul style="list-style-type: none"> • Using a low tech product? • Using an online platform? • Using a community-based initiative or another way? <p>Thinking about your solution – describe how it works for the user/customer. Draw out a storyline of their journey, how do customers interact with it.</p>	<p>Is the problem urgent? Is it unavoidable? How many people have this problem? Who else is trying to solve this problem? How? What do other people think of the solution? Are they willing to buy/use your solution? Do they think it can be made better?</p>
<p>What are you confused about? What are your issues right now?</p>	  	<p>We need mentor support (circle) : YES NO</p> <p>We need help with (Circle): Problem Solution Validation Financials Pitching Technology Team</p>

Hackathon Format

Many also have aspects to entertain, inspire and appease participants, such as:

- Guest speakers
- Mentors with relevant experience
- Prizes
- Merch and/or meals/snacks
- Press/social media presence (to create a buzz)

The duration of a hackathon can vary from one day, a weekend, 48-hours spread over 3 days, or for prolonged periods such as a semester (Cobham et al., 2017; Kienzler & Fontanesi, 2016).

This has provided me with a very different perspective on entrepreneurship and opened up a whole new area of business that I never even knew existed.

Isabel Sinnott

This hackathon was intense, engaging and collaborative where we were inspired to create concepts that could be turned into ventures. Faria Salma Samia

I left DCU that day feeling inspired. Tara Sleightholme

How did we come up with the challenges?

What Topics Did the Students Work On?

For our 2021 hackathon we came up with over 300 topics related to social issue themes nominated by students. Students voted for their favourite 10 topics and were allocated to teams based on their selections. Here were the topics that made the Top 102.

Student nurses are heroes - pay them!!
Stress reduction
Social anxiety post-covid: Making friends
Social anxiety post-covid: Leaving home
Smart cities
Sleep disorders
Sign language for all
Save the bees!
Reintegration for ex-prisoners
Recycle properly
Recording the joy of post-lockdown for future generations
Racial discrimination in hiring/recruitment
Protecting our beaches
Preparing for extreme weather
Politics and the climate crisis - the need for urgency
Pizza boxes are garbage
Opinions based on algorithms - social media
Only people with money can afford to care about fast fashion
Only girls care about fast fashion
Online delivery packaging
Nursing homes and loneliness
More sustainable flying
Microplastics - tiny but terrible

Making the sneaker game more sustainable
Making takeaways more sustainable
Learning about other cultures
Keeping an exercise regime is hard!
Is the Forbes list good for mental health?
Irish tourism - how to repair our 'cead mile failte'
How to reignite interest in sports?
How to park electric scooters
How can sports continue to function?
How are people exercising?
Homelessness in Ireland
Have club sports changed?
Guiding youths from disadvantaged areas away from crime
Grow your own
Globally, 1/4 of young women between 15-24 will not finish primary school
Global equity in the vaccination rollout
Food and nutrition, changing attitudes?
Far from home - the challenge of moving abroad for school/work
Exercise and emotional wellbeing
Empathy building: Technology enabled
Emergency response in climate disasters
Eating disorders

Why don't we all use more solar?
What parts of online learning would you keep?
What is direct provision?
We all deserve a party!!!
Water - the most valuable commodity
VR and sport - what next?
Universities and paper-waste
Understanding nutritional information
Understanding mindfulness
TikTokTikTok: social media and our lost time
The stigma around depression
The shift to EV worldwide
The housing crisis in Ireland
Technology and the aging population
Team sports for all
Sustainability guilt - its hard to be perfectly sustainable
Support Local

mental health and climate anxiety - what can we do?
Making tree-planting cool
Making thrift stores more effective
Can our stepometers make us money?
Transport issues for those with accessibility needs
We treat tents like fast fashion
Going viral - why do people want to be influencers?
Celebrating neurodiversity
Bike theft prevention
Autism-friendly classrooms
Accounting in the future
Sustainable farming practices
Reducing our food waste
Reducing the student carbon footprint
Anger Management.
Addiction
Breaking the glass ceiling
Can our stepometers make us money?
Transport issues for those with accessibility needs
We treat tents like fast fashion
Going viral - why do people want to be influencers?
Celebrating neurodiversity
Can we use more plant-based materials?

Drug and alcohol abuse
Domestic violence
Do we check who made it?
Do graduates want to work remotely in the future?
Dealing with presentation/public speaking anxiety
Coping with social media
Coping with freedom post-lockdown
Cooking over Ordering-in
Concerts in the post co-vid era
Childhood obesity
CEO to worker pay gaps are shocking!
Celebrating cultural diversity
Will health habits change?
Bridging the gap between developed and developing countries
Body dsymorphia
Are uniforms a good idea?
Going vegan!
Fake news distress
Do footballers promote fast fashion?
Ditch the car
Inform ourselves: Global Crisis
Inclusive Festivals

1. Why don't we all use more solar?
2. What parts of online learning would you keep?
3. The importance of pronouns
4. Water - the most valuable commodity
5. VR and sport - what's next?
6. TikTokTikTok: social media and our lost time
7. The shift to Electric Vehicles worldwide and in our villages
8. The housing crisis in Ireland affects us all
9. Sustainability guilt - it's hard to be perfectly sustainable
10. Social anxiety in the era of 24/7 digitisation
11. Smart cities for evolving citizens
12. Sign language for all
13. Save the bees!
14. Protecting our beaches
15. Racial discrimination in the workplace
16. Preparing for extreme weather
17. Increasing awareness about fast fashion
18. Nursing homes and loneliness
19. **WILDCARD:** We can do better! [Open-ended]
20. Irish tourism - how to repair our 'cead míle fáilte'
21. Far from home - the challenge of moving abroad for school/work
22. Exercise and emotional wellbeing
23. Feeling safe on our streets
24. Empathy building: Technology enabled
25. Body dysmorphia is a critical issue
26. Making concerts & festivals energy-efficient
27. Sustainable farming
28. Transport issues for those with accessibility needs

Student example

- Team topic: “Fast Fashion”.
- They chose to focus on: Christmas Jumpers
- Solution: Festive iron-on transfers for regular jumpers to avoid purchasing jumpers for the Xmas party.

The more defined the problem, the more specific the solution can be

Even as an online event – it can be done!

Mental Health

So what's next?

Hackathon Research Project Underway

- Studying the effect of different forms and formats of hackathons on student experiences of the university, climate change anxiety and entrepreneurial tendencies
- Expected 1500 student responses

**Ineffective water use in our
daily lives**

Your turn

UTEC PRESENTS:
**THE FIRST BILLBOARD THAT PRODUCES
DRINKING WATER OUT OF AIR**

Your turn

Saving Water

You can save water as adjusting bathtub by three angles

**What are the challenges in using
hackathons?**

There are reasons to be sceptical

- They are costly to run and use a lot of time, resources and social capital (contacts)
- They can be reliant on a core teacher as champion – not sustainable
- They are fast-paced and use impromptu pitching techniques – which can make students anxious/lost/frustrated
- They are 'live' so multiple things can affect them (like pandemics and losing voices!)
- They may give participants a false sense of the complexity involved in start-up and solving innovative challenges

Consider the tone of the event

- Competitions and “Winners” for solutions to complex problems may be flawed.
 - *In social care Ed. participants found the competitive element detracted from the educational experience. (Cwikel and Simhi, 2022).*
- Be authentic – have the theme permeate the event
 - *E.g. A theme of inclusivity needs to have speakers from multiple diverse backgrounds*
 - *Sustainability hackathon – use recycled items!*

Inclusivity & Student welfare

- Be aware that some topics may be triggering for students – prepare them
- Presentation anxiety post-covid is real
- Students with autism need to be considered in these large format groupwork situations (add quiet rooms)
- For large class contexts, build in some alternate deliveries (present as a conversation to one judge rather than a pitch in front of class)

Some early indications

Hackathons are immersive, yet accessible

They embrace hybrid learning methodologies

Are experiential and can be meaningful

N=466

A novel experience for students but also bounded

Before Hackathon	Mean	After Hackathon	Mean	Change
I was knowledgeable about the theme/social issue.	3.18	I am now [...]	4.17	0.99
